Claims 1 to 19

The invention set forth in claims 1 to 19 is not disclosed in any of the documents cited in the international search report, and is therefore novel and involves an inventive step.

None of the documents cited in the international search report indicates that a silanol group on the end of a molecule is eliminated by having a substance contain "a metal alkoxide having only one hydrolyzable group, and/or a hydrolysate thereof", and it would not be easy for a person skilled in the art to conceive of said feature.
